Plug-In Texas Commends Congressman Michael Burgess on Energy Efficiency Summit

“Plug-In Texas compliments Congressman Michael Burgess for his ongoing annual Energy Efficiency and Conservation Summit and Fair being held Saturday, July 17 in Corinth.

Plug-In Texas is pleased that this year's summit and fair includes a panel on electric vehicles and other alternative fuels. Brian Tulloh, vice president of Public Affairs for TXU Energy will be representing both TXU Energy and Plug-In Texas on the Efficiency and Conservation for Mobility panel.

The soon-forthcoming EVs with almost zero-emissions are a practical, useful part of the solution for improving air quality in North Texas and are fun, affordable clean-energy cars for drivers.

Plug-In Texas is working with cities all over North Texas to plan for implementation of infrastructure, including public and private charging stations, as EVs come to market in late 2010.

Plug-In Texas is committed to raising awareness of electric vehicles and their economic and environmental benefits in the Lone Star State. We thank Congressman Burgess for his leadership on the House Energy and Commerce Committee and for his hard work on behalf of his North Texas constituency.

###

About Plug-In Texas: *Plug-In Texas is a broad-based and growing statewide coalition of private and public interests dedicated to supporting policy changes that promote battery electric, plug-in hybrid and all-electric vehicles in Texas, as well as the infrastructure needed to support them. Plug-In Texas will support activities that create new jobs, foster development of new technologies, improve environmental conditions and spur economic activity that supports the electric vehicle industry. The coalition serves as a clearinghouse for information on EVs, and supports initiatives that market the development and promote the commercial viability of EVs. Plug-In Texas' membership includes: Environment Texas, Environmental Defense Fund, Luminant, NRG Energy, Texas Automobile Dealers Association, and TXU Energy.
